

Are you or someone you care for on the autism spectrum?

Researchers at the University of New South Wales and Autism CRC are looking for adults on the autism spectrum and carers to complete a survey and/or an interview about autism diagnosis in adulthood.

We are especially looking for adults who were diagnosed **before age 18** and adults with **intellectual disability**, to better understand the differences between early and late diagnosis and how intellectual ability affects adult autism diagnosis.

For the **survey**, you will need to be:

- 18 years or older
- Have an autism spectrum diagnosis (including Asperger's syndrome or PDD-NOS) or think you may be on the autism spectrum
- Living in Australia
- Or carer of a person with intellectual disability who meets the above criteria

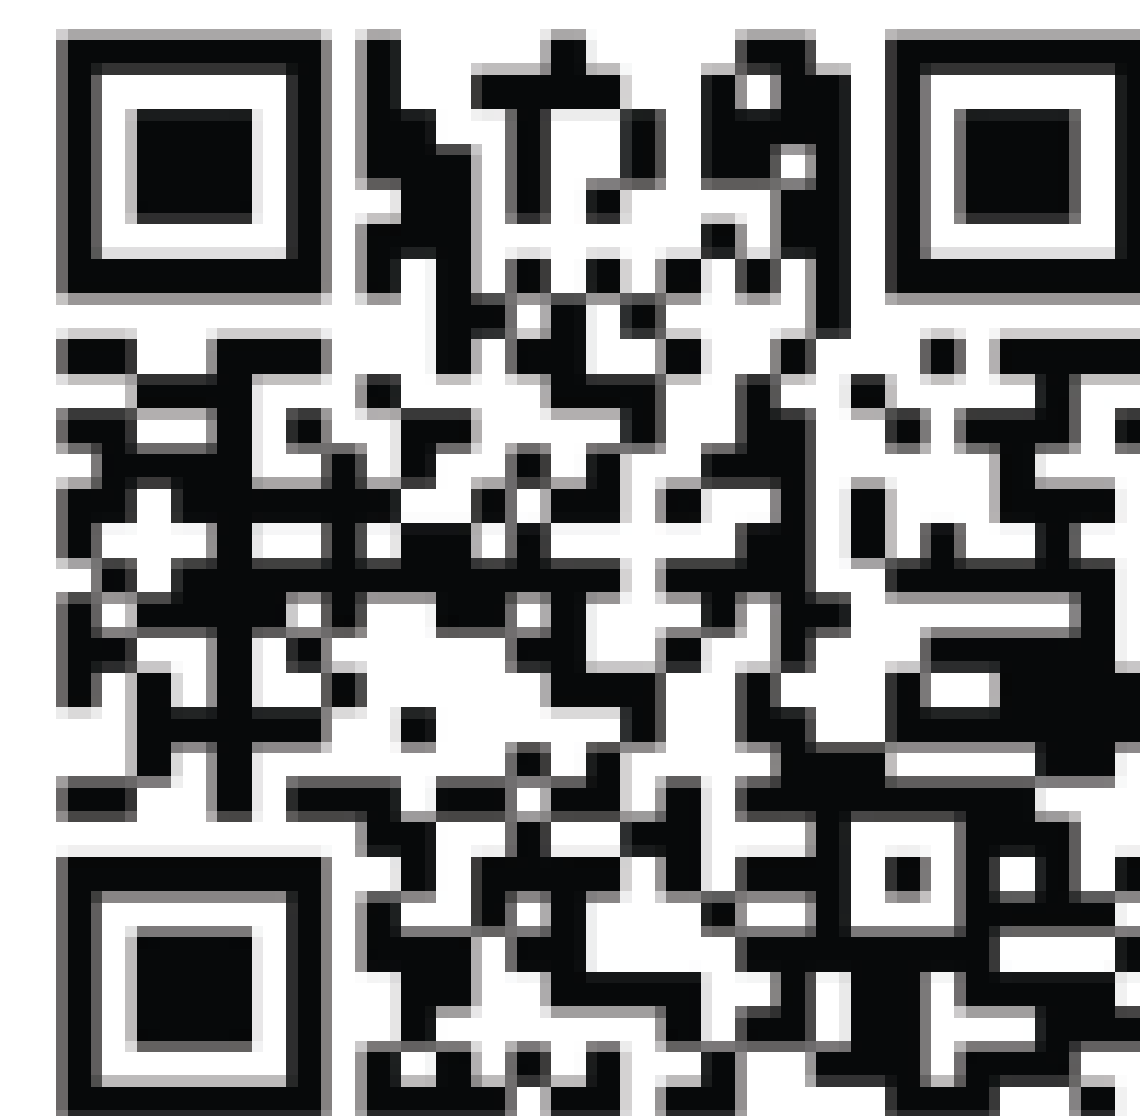

For the **interview**, you will need to be:

- An adult or carer/support person of an adult who received an autism spectrum diagnosis in adulthood

You will have the chance to win 1 of 5 \$100 gift cards for the survey, and/or be paid \$60-\$80 for the interview.
